

Part 1 Completed!

This marks the end of the first part of the course.

What You Should Now Be Able to Do

After completing this section, you should be able to:

- Take a pretrained model and fine-tune it
- Apply it to a text classification problem:
 - Single-sentence classification
 - Or sentence-pair classification
- Upload the fine-tuned model to the Hugging Face Model Hub

Your Next Task

To verify that you have mastered this section, you should:

- Choose a problem that interests you
- Fine-tune a pretrained model on that problem
- Upload the resulting model to the Model Hub

The problem does not have to be in English — you are encouraged to work in another language if you prefer.
